Seattle, WA 98124

Re: Boeing Co-North Field, N-17-0021-003

Dear Sir or Madam:

The Department of Ecology is required to develop a comprehensive program for cleaning up hazardous substances. As part of this effort, Ecology must prepare a list of sites which are known or suspected to be contaminated.

According to our records, you are listed as the owner and/or operator of a site(s) known to be contaminated with hazardous substances. Enclosed is the information which Ecology has in its files regarding this site(s).

We know this list will be sensitive and we therefore want to make every effort to insure we have accurate information. We are contacting you to provide you an opportunity to review the enclosed information before Ecology finalizes the contaminated site list.

The public, news media, legislators, local officials and others are already asking for the list. Since the information is subject to public disclosure, we plan to release the list on request.

It is very important that you review the enclosed information. At this time, we are trying to correct the obvious factual errors. Please describe any corrections on the "Owner/Operator Site Information" form. In some cases, you may be citing an environmental audit or inspection performed by a private contractor. We expect the consultant's name, address, phone and date of the study to be listed. In addition, you should attach the cover page or summary of any environmental assessment.

Send the form and any supporting material to the appropriate Ecology office by January 30, 1989. (A list of Ecology offices and contact persons is attached.) Information submitted by January 30 will be reviewed by Ecology staff before the list is finalized in mid-February.

Page 2

Initially, we will be looking for major factual errors such as inaccurate or inappropriate addresses, owners, and operators. If you have any factual information on these matters, we will verify it and correct the database.

Information you offer on more substantive issues, such as type of contamination, will require a longer review and verification process, and we will contact you about those issues in the future.

Your prompt response will enable Ecology to develop an accurate list of known and potentially contaminated sites in Washington.

Thank you for your cooperation.

Sincerely,

Carol L. Fleskes
